Summary

Informatics Engineering student at Universidad Nacional de Trujillo with project experience in full stack web development. Built academic and institutional applications using Laravel, React, TypeScript and PostgreSQL, and contributed to a collaborative virtual tour editor. Interested in applying software development and problem-solving skills to practical challenges.

Education

Universidad Nacional de Trujillo — Trujillo, Peru
Informatics Engineering — degree in progress — 2022–Present

Projects

Pre-professional Internship Management System — UNT
PHP, Laravel, PostgreSQL, Vite | University project

- Developed a web application to manage and monitor pre-professional internships for the School of Computer Science at UNT.
- Implemented company registration with RUC lookup and automatic data completion, with manual entry when the lookup service is unavailable.

github.com/sergio3212004/sistema-practicas-unt

Political Science and Governance Website — UNT
React, TypeScript, Vite, Tailwind CSS, React Flow

- Developed an institutional website presenting academic information, faculty and news for the School of Political Science and Governance at UNT.
- Created an interactive curriculum and a reusable structure for other schools.
